MALLARD BAY HOMEOWNERS ASSOCIATION

ARC Board Handbook

A short guide to reviewing and deciding architectural requests in the Architectural Request Center.

The short version. Sign in with your name (no password). Read each request's Details and Documents. Talk it over on the Discussion tab. Decide on Communication & Vote. It takes **2 matching votes** to approve or deny, and a request nobody decides in **28 days is approved automatically**.

1. Signing in

- Go to the Board Sign In page and pick your name. An emailed sign-in link goes to your address on file. The link works for 30 days.
- Emails from the app (new submissions, resident replies, reminders) include their own sign-in link that opens that exact request, already signed in.

2. Your dashboard

The **ARC Requests** list shows every submitted request, **most recent activity first** (a new request, comment, message, vote, or document all move it to the top).

New reply badge	A resident has replied since you last opened that request. It clears when you open it.
Status	In Review, Info Requested, Approved, Approved (Conditions), Denied, Auto-Approved, or Approval Expired.
Due	Time left against the 14-day response target: grey = on track, amber = within 3 days, red = overdue.

3. Inside a request

Details	Resident name and email, their project description, and whether they certified compliance.
Documents	Plans, photos, and permits they attached. View or download each one.
Discussion	Board-only notes. The resident never sees this tab.
Communication & Vote	The official thread with the resident, plus Approve and Deny.

There is no automatic compliance check. The resident's checkbox is the only gate at submission. Read the description and documents carefully; the board's judgment is the safeguard.

4. Asking the resident for more information

On Communication & Vote, type your question in the box and click `Send`. The resident is emailed right away, and the request shows **Info Requested**. When they reply, every board member is emailed and the request returns to In Review. Everything on this tab is visible to the resident.

5. Approving or denying

- **2 matching votes decide it.** One vote alone does not. The tab shows the running tally.
- **Approve:** conditions are optional (comma-separated). The resident sees them.
- **Deny:** you must cite the specific rule or code section the plan does not meet (Utah HB 217). The Deny button will not submit without one.
- You can change your vote by submitting again, until the request is decided.
- You cannot vote on a request tied to your own address.

6. Deadlines

- **14 days:** response target. If it passes, the board gets a reminder email. Nothing changes automatically.
- **28 days:** if no decision has been made, the request is **approved automatically**, whatever it contains, and the board is notified.
- **90 days after approval:** the approval expires if work has not started (Rule 9.5). The resident is warned around day 75.
